

# IRTG 1422 Presentation Seminar

Course Coordinator: Heidrun Schmitt

Date: July 27. / 28. 2009

Venue: Institut für Anorganische Chemie, Stromeyer Seminarraum T138

## Course Content:

The 2-days-workshop focused on presentation as self presentation and presentation of scientific issues which go together as it is the question of appropriate access to the audience.

We worked on self confidence, structure, handling of questions, handling of distortions, interactive approach and media (power point/ flip chart).

Presentations are convincing if there is consistence of the content, the language, the visualisation and the person adapted to and taking in account the needs of the audience.
