Metal Sites in Biomolecules:
Structures, Regulation and Mechanisms
Sprecher: Prof. Dr. Franc Meyer

IRTG Guest lectures

Winter semester 2008/2009

- 2008-10-22, 05:00 pm, MPI for Biophysical Chemistry, large seminar room

Prof. Dr. Frank Neese (University of Bonn)

"Combination of spectroscopy and quantum chemistry to obtain insight into the reactivity of nonheme iron centers in chemistry and biology"

- 2008-11-18, 05:15 pm, lecture room III

Dr. Claudia Blindauer (University of Warwick, GB)

"Imidazoles as mediators of metal ion specificity and reactivity for non-catalytic zinc sites - lessons from proteins involved in zinc housekeeping"

- 2009-01-19, 05:15 pm, lecture room III

Prof. Dr. Albrecht Berkessel (University of Koeln)

"Biomimetische Katalyse mit H-Brücken-Netzwerken"
